

# 14th Laser Ceramics Symposium 2018

<http://lcs2018.jp>

Nov. 26 (Mon.) – 30 (Fri.), 2018, Okazaki Conference Center, Okazaki, Japan

<http://www.orion.ac.jp/occ-e/>

**Paper Deadline: Oct. 1 (Mon.) 2018**

**LCS** - International Symposium on Transparent Ceramics for Photonic Applications is an annual international conference since 2005. The aim of the symposium is to provide a forum for material scientists, chemists and physicists, to discuss the state of the art of optical transparent ceramics, including basic aspects and promising applications, and to give an insight into future advances and research possibilities in this field. The previous LCS events were held in Poland (2005), Japan (2006), France (2007), China (2008), Spain (2009), Germany (2010), Singapore (2011), Russia (2012 and 2017), South Korea (2013), Poland (2014), China (2015), and France (2016). It is our honor and pleasure to organize the 14th LCS in Japan in the city of Okazaki. The symposium program will include invited talks as well as contributed (oral and poster) presentations. We hope that the symposium will bring together leading experts from around the world, will stimulate active discussions and links between scholars and will give a brilliant opportunity for the participants to start further fruitful research collaborations.

## **SCOPE**

: Ceramics, crystals, microdomain controlled materials for advanced SSL and NLO  
(SSL: solid-state laser, NLO: nonlinear optics)

### **A. Material and Fabrication**

- Synthesis of high purity powders and transparent ceramics
- Optical spectroscopy and characterization of physical properties
- Ceramic machining and polishing
- Surface activated low temperature bonding and coating
- Electric and magnetic field poling for polarization control
- High-field laser direct and its shockwave based material fabrication
- New materials, novel fabrication methods and microstructure control

### **B. Device and Application**

- Ceramic lasers and amplifiers for high performance SSL and NLO
- High power SSL structures; rod, fiber, disk, and slab
- Breakthrough in tiny integrated lasers, includes giant-pulse microchip laser
- Novel power SSL structures
- High power diode lasers, VCSELs for SSL pumping
- Giant micro-photonics toward ubiquitous power lasers
- Applications of SSL and NLO: Ignition, LIBS, LiDAR, Mass spectroscopy, Material processing

Organized by *Institute for Molecular Science, Japan*

# Call for Papers **LCS2018**

## **COMMITTEES**

### Symposium Chair

**Prof. Takunori Taira** Center for Mesoscopic Sciences, Institute for Molecular Science (Japan)

### Symposium promoters and scientific program advisers

**Prof. Alexander A. Kaminskii** Institute of Crystallography, Russian Academy of Sciences (Russia)

**Prof. Wieslaw Strek** Institute of Low Temperature and Structure Research, Polish Academy of Sciences (Poland)

**Prof. Ken-ichi Ueda** Institute for Laser Science, University of Electro-Communications (Japan)

### International Program Chair

**Dr. Tohru Suzuki** National Institute for Materials Science (Japan)

### International Program Committee

**Prof. Gerard Aka** Chimie ParisTech Institute (France)

**Prof. Benoît Boulanger** University of Grenoble Alpes (UGA) (France)

**Prof. Georges Boulon** Institut Lumière Matière (France)

**Dr. Mark Dubinskii** Army Research Laboratory (USA)

**Prof. Marc Eichhorn** Karlsruhe Institute of Technology (KIT) (Germany)

**Prof. Romain Gaume** CREOL, University of Central Florida (USA)

**Prof. Hong Jin Kong** Korea Advanced Institute of Science and Technology (South Korea)

**Dr. Akio Ikesue** World-Lab Co. (Japan)

**Dr. Takashi Ito** BAIKOWSKI JAPAN (Japan)

**Prof. Maxim G. Ivanov** Institute of Electrophysics, Russian Academy of Sciences (Russia)

**Prof. Efim A. Khazanov** Institute of Applied Physics, RAS (Russia)

**Prof. Jiang Li** Shanghai Institute of Ceramics, Chinese Academy of Sciences (China)

**Prof. Voicu Lupei** National Institute for Lasers, Plasma and Radiation Physics (Romania)

**Dr. Sergey Mirov** University of Alabama at Birmingham (USA)

**Prof. M. Mortier** Ecole Nationale Supérieure de Chimie de Paris (France)

**Mr. Katsuhiko Muramatsu** Konoshima Chemical Co. (Japan)

**Prof. Martin Richardson** College of Optics & Photonics, University of Central Florida (USA)

**Dr. Jas Sanghera** Naval Research Laboratory (USA)

**Prof. Yehoshua Shimony** Nonlinear Optics Group, Soreq NRC (Israel)

**Prof. Akira Shirakawa** The University of Electro-Communications (Japan)

**Prof. Irina Sorokina** Norwegian University of Science and Technology (Norway)

**Prof. Setsuhisa Tanabe** Kyoto University (Japan)

**Prof. Dingyuan Tang** Nanyang Technological University (Singapore)

**Prof. Yiquan Wu** Kazuo Inamori School of Engineering, Alfred University (USA)

**Prof. Ryo Yasuhara** National Institute for Fusion Science (Japan)

**Prof. Takashi Yatsui** University of Tokyo (Japan)

**Prof. Akira Yoshikawa** Tohoku University (Japan)

**Dr. Jian Zhang** Shanghai Institute of Ceramics, Chinese Academy of Sciences (China)
